Appln No. 09/693,565
Amdt date May 9, 2006**Amendments to the Specification:**

Please replace the 2nd paragraph on page 15, line 19 with the following replacement paragraph:

The safe assemblies of FIG. 3, are similar to the safe assemblies described in FIG. 1. Some of the safe assemblies include memory that stores cash records and a processor that compiles the cash records to generate deposit reports. Each deposit report from each safe assembly is transmitted to the host safe assembly. The host safe assembly combines each deposit report from each safe assembly with the cash records from the other safe assemblies to create a deposit report. An example of a new safe assembly is described in an application entitled "Loose Coin And Rolled Coin Dispenser", ~~Docket No. A484-40688~~ U.S. Patent Application No. 09/692,802, filed October 20, 2000, now abandoned, incorporated herein by reference.
